Meaning of Acronyms

Term	Full Name	Description
ARCV	Arc of Vision	The vertical angular distance between the Moon and the Sun at sunset.
ARCL	Arc of Light	The angular separation between the Moon and the Sun on the celestial sphere.
DAZ	Difference in Azimuth	The horizontal angular separation of the Moon and the Sun along the horizon.
Δ alt	Altitude Difference	The Moon altitude minus the Sun altitude.

Note: Note: ARCV, ARCL, and DAZ are mainly used for young crescent visibility studies and are not general lunar phase labels.
